We are a dynamic company. We employ highly qualified personnel from large companies in the fight against fires.

Our long experience in the production of fire-fighting motor pumps on fixed and towable supports allows us to offer a wide range of solutions made according to the most varied needs, both at the dimensional level and that of use.

The ability to assume and solve diverse and complex problems ensures full customer satisfaction. Our operative-ness and our

many years of expertise allow us to handle with extreme efficiency customer requests, reducing to minimum the completion time.

We are able to offer multiple types of fire engine pumps on supports such as trailers of transport of goods, light trailers, heavy trailers and open or soundproofed skids. This allows us to achieve the most specific needs, by providing specialized products and productions of individual units highly personalized.

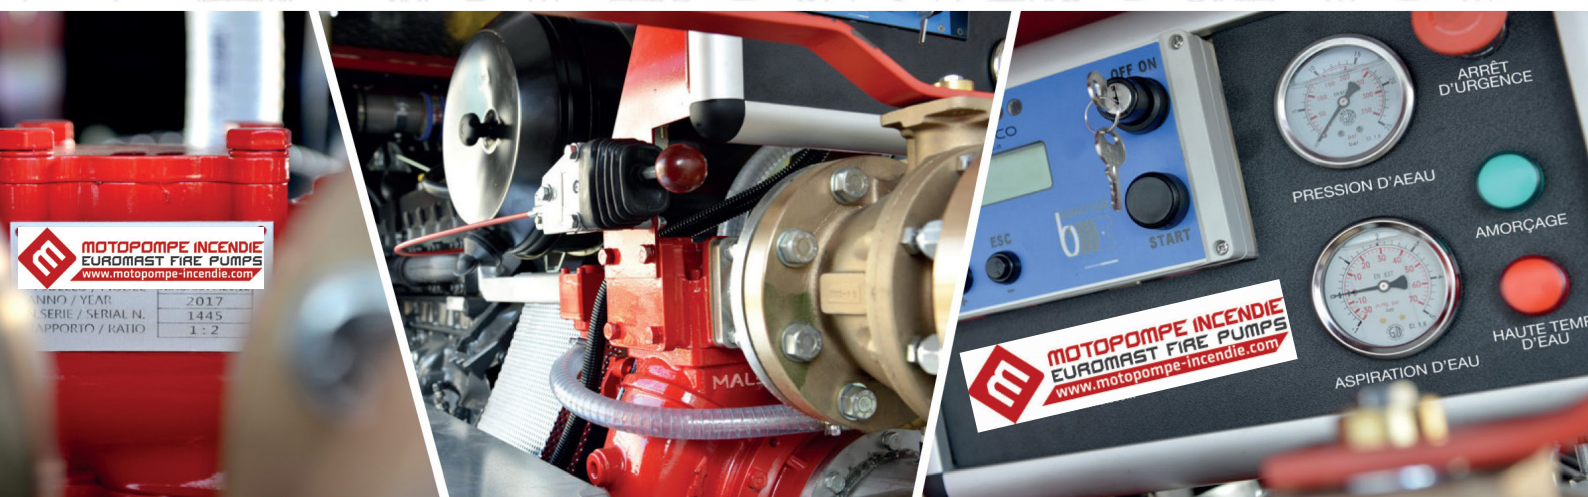

The diesel and gasoline drive engines adopted for our production come from the most famous and noble manufacturers and guarantee absolute reliability, robustness, low consumption, high efficiency as well as the possibility to operate in many and various climatic conditions.

NIAGARA fire-fighting motor pumps are designed, studied and manufactured to provide the best performance, ensuring a great reliability, the possibility of having highly personalized solutions, an excellent price-quality ratio, a simple but charming typically Italian as well as extremely reduced weights and dimensions, in favor of the load capacity and maneuverability which characterizes all current production.

Efficiency, reliability, robustness and the possibility of working in all weather conditions give fire-fighting pumps NIAGARA the particularity of being able to be used in civil, military, industrial, naval environments, refineries and chemical factories.
